ABOUT ME

Computer Science and Engineering student with hands-on experience building full-stack web applications using React, TypeScript, Node.js, Express.js, Prisma ORM, and PostgreSQL. Experienced in designing scalable RESTful APIs, implementing secure authentication systems, and developing responsive user interfaces. Passionate about building modern, user-focused software and continuously expanding technical expertise.

PROJECTS

BachelorHub

Full-Stack Web Platform for Bachelor Students

- Developed a full-stack platform connecting bachelor students with rental housing, home chefs, blood donation, ride sharing, used-item marketplace, events, and community services.
- Designed and implemented 95 RESTful API endpoints using Express.js, TypeScript, Prisma ORM, and PostgreSQL to support scalable backend operations.
- Implemented JWT authentication, role-based authorization, file uploads, and secure CRUD operations for users, listings, bookings, chat, and other platform modules.
- Built a responsive dashboard featuring profile management, notifications, messaging, and role-based access control.
- Tech Stack: React, TypeScript, Tailwind CSS, Node.js, Express.js, Prisma ORM, PostgreSQL, JWT.
